10 Uses For Cow Poop

By Netcrosystem H.

10 uses for the rare and useful substance we know and love is exactly what this article is about, and I will talk about nothing else. Okay, let's start with use numero uno (very complex Spanish meaning number 1). Use 1 is you can take a bath in it, as it is very relaxing and makes you smell great, kind of like my mom's mystery pie. I never found out what was in that pie. Okey dokey number 2 is up now, you can use it as a face wash. It smells delightful. Just put it on a rag and rub your face clean with it. You'll smell just like perfume! Welp, onto numero 3. You can put it into your ice cream! Just microwave for 2-3 minutes, and top your ice cream with it! Number 4, you can rub it on you. It works as an amazing mosquito repellent! Smells good, too! Numero 5, you can use it as shampoo! I swear to god, it works SO well, too good for words. Number 6, it is THE BEST surface cleaner! Rub it onto your desk, and it gives you that shine effect. Number 7, you can use it as a top-notch skin moisturizer. It just simply gives you that "kissed by milk" feeling.

Numero 8, we have film development. Bake cow poop at 350 degrees Fahrenheit for 3 hours, mix with 1 gallon of water, and dunk film in it. Number 9, we have an all-natural thing to burn in your bonfire or local tire-fire. Insert cow poop into toaster, put on 350 degrees Fahrenheit for 10 minutes, take out and put it in your fire! And our last use, store CDs in it! The cow poop will keep your CDs and DVDs perfectly safe. When you take them out of the cow poop, they'll be totally clean and unscratched!
